NA: <http://forum.worldoftanks.com/index.php?/topic/125403-wot-statistics/unread/>

Introduction

WOT Statistics is aimed to provide you information of how well you played within selected period and/or your results in general.

This application is windows based.

Requirements:

- .Net 4 Framework (download link: <http://www.microsoft.com/en-us/download/details.aspx?id=17851>)
- Administration rights on your pc
- Please check your anti virus. Please make sure the application files are not being blocked or sandboxed. (Found avast is sandboxing the application files).

In order to use this application you need to [Setup Players](#) for player(s) you would like to track.

Read more:

[Installation](#)

[Setup Players](#)

Installation

1. Double click on "Setup WoT x.x.x.x.exe" file (where x represents version number)
2. Click Next button
3. Uninstall previous version(s), if any
4. Select destination folder
5. Check "Create a desktop icon" checkbox if you want desktop icon to be created
6. Click Next button
7. Click install
8. Click Finish button once installation is complete

What's new in v2.0.6.25

v2.0.6.25 (Released on: 08-October-2013)

- Bug fix: Issue related to T-50-2 - Wargaming removed this tank from dossier file and that caused issues for players which had this tank.
- Bug fix: Incorrect Frags calculations for WN7 on Recent Battles tool tip.
- Bug fix: Incorrect calculations for WN7 on Tank Tier Statistics section on [Overall](#) report.
- Bug fix: Problem where updater screen did not appear on startup when application was in System Tray.
- Bug fix: System did not update when started in system tray.
- Bug fix: Sorted SQLite connection error.
- Bug fix: Fixed flickering on dossier file refresh.
- New: Option "Minimize to System Tray on close". Read more [here](#).
- New: Option "Auto create new session". Read more [here](#).
- New: View Previous/Next session on Recent Battles report. Read more [here](#).
- New: Links to WOT Stats website and forum on EU and NA server.
- Change: List of available languages sorted alphabetically. Read more [here](#).
- Change: Calculations code partially optimized.
- Change: Prevent user from creating new session if empty session exist. Empty session will be updated instead.
- Change: Check if user's history exists when player has been added. If not - create history files.
- Removed: Version settings on [Setup](#) screen
- Removed: Online Analyzer on [Setup](#) screen
- Removed: Kills and Efficiency tooltips on [Recent Battles](#) report when battles are grouped.

v2.0.6.18 (Released on: 22-September-2013)

- Bug fix: Support for global date time formats. Fixes errors encountered with new database

v2.0.6.13 (Released on: 18-September-2013)

- Bug fix: Fixed problem preventing database to be properly created on online updater
- Changes: Changed default font size for menus

v2.0.6.12 (Released on: 17-September-2013)

- Bug fix: Fixed "Could not load file or assembly 'System.Data.SQLite.dll' or one of its dependencies. The specified module could not be found." error
- Bug fix: Fixed "System.IndexOutOfRangeException: Index was outside the bounds of the array." error

v2.0.6.8 (Released on: 14-September-2013)

- Bug fix: Fixed problem in datatakon method
- Changes: WN6 & WN7 Calcs

v2.0.6.7 (Released on: 14-September-2013)

- Bug fix: Corrected defense points in rating formulas
- Changes: Put in check that if data didn't convert correctly to new database, it will redo the data on app restart

What's new in v2.0.6.6

v2.0.6.6 (Released on: 14-September-2013)

- WoT 8.8 compatible
- Bug fix: Fixed scripting problem on the Recent Battles Report
- Bug fix: Fixed total value for rating system on the Recent Battles Report
- Bug fix: Corrected WNx calculation formulas
- Bug fix: Corrected inactive tanks filter
- Bug fix: Corrected spelling mistake on Overall Report
- New: Implemented more transparent method to download updates
- New: Possibility to push dossier decrypter to clients without a new version release
- New: Moved Recent Battle entries from text file to sqlLite database
- New: No limit on number of Recent battles stored
- New: Sessions implemented in Recent Battles report
- New: Toolbars on Recent Battles report has been changed. Read more [here](#).
- New: Added some filters to recent battles
- Changes: Removed Achievement Report as it is now available in game

What's new in v2.0.5.8

v2.0.5.8 (Released on: 21-June-2013)

- WoT 8.6 compatible
- New, faster installer/uninstaller implemented
- Added Rating formulas (WN4, WN6 and WN7). Read more [here](#).

v2.0.5.5 (Released on: 23-March-2013)

- Fixed Issue - "Error: Unable to parse json (****) - Empty path name is not legal."

v2.0.5.4 (Released on: 23-March-2013)

- Added support for servers with multiple game servers (EU1 and EU2). No user's intervention needed when switching between servers.
- Fixed sorting on Recent Battles report
- Fixed problem where achievement bar doesn't reset on completion of series in Achievement Progress report
- Grouped Master Tanker list by country, added numbering the items

v2.0.5.3 (Released on: 07-March-2013)

- Fixed a couple of minor tool tip related bugs on "Recent Battles" report.

v2.0.5.2 (Released on: 07-March-2013)

- WOT 8.4 Compatible
- Fixed delta column values
- Removed minimum games played requirement on "Top 5 Max Experience" list
- Added tool tips onto "Recent Battles" report. Read more [here](#).

What's new in v2.0.5.0

v2.0.5.0 (Released on: 15-February-2013)

- Fixed *Reset At* feature. Read more [here](#).
- Added languages (German, Russian, Polish) . Read more [here](#).
- Average Tier in Total row on [Recent Battles](#) report
- Implemented translations into application
- Updated Efficiency calc to the new XVM formula
- Added average tier onto "Recent Battles" report
- Fixed the issue where users weren't able to edit or delete "Custom Groupings" and "Charts"
- Fixed the issue where the app was not updating the dossier history when minimized to the tray icon
- Fixed the issue with the "Reset At" feature
- Added auto update of translation file from website
- Added auto update of images from website
- Added auto update of settings file from website

v2.0.4.3 (Released on: 19-January-2013)

- WoT 8.3 compatible

v2.0.4.2 (Released on: 24-December-2012)

- Fixed UK tank images
- Added missing tank images
- Fixed minor app crash issues
- Fixed duplicate keys error for "Custom Grouping" and "Graphs" report
- Changed WOT Reset to reset history folders when app crashes

v2.0.4.1 (Released on: 12-December-2012)

- Corrected positions of the frag list

v2.0.4.0 (Released on: 12-December-2012)

- Disabled online Analyzer

v2.0.3.8 (Released on: 12-December-2012)

- Setting up a new dossier file, Default file browser will open in the dossier cache folder
- Added support for file sharing, Dropbox, SkyDrive etc.
- Added time correction for dossier resetting. User will be able to adjust the time when his file should reset.
- Changed performance indicator on "Recent Battles" report for damaged received.
- Added a minimum battle count for Top 5 stats. User able to change the value.
- Added "Achievement Progress" report currently showing. Lion of Shanai, Hunter, Mouse Trap and Patton Valley
- Excluding inactive tanks like the KV

Bugs fixed:

v2.0.3.8 (Released on: 12-December-2012)

- Corrected duplicate ID's for Custom Groupings and Graphs

v2.0.3.5 (Released on: 02-November-2012)

- WoT 8.1 compatible

v2.0.3.0 (Released on: 27-September-2012)

- Fixed averages on recent battle report

What's new in v2.0.2.0 (Released on: 02-August-2012)

- Setup/Colors - change colors on your reports and charts (Read more at [Setup Colors](#)).
- Links to [Tank Info](#) report implemented on several reports (click on tank name in report and it will take you to [Tank Info](#) report with that tank selected)
- Averages on [Recent Battles](#) report (please note Average results at the bottom of report in all listed columns)

Bugs fixed:

- Incorrect sorting on reports when certain Regional Settings for numbers have been used (e.g. German or French)

- Battles missing on Recent Battles report

What's new in v2.0.1.0 (Released on: 15-July-2012)

- New [Online Analyzer](#) button
- List of tanks that needs to be destroyed to achieve Master Tanker medal on [Kill Summary](#) report
- Few bugs found in previous version fixed

What's new in v2.0.0.0 (Released on: 04-July-2012)

Beside completely redesigned user's interface here are some major changes and new features that you can find in this version:

- numbers are aligned and formatted correctly
- adjustable font size and date/time formats - read more [here](#)
- you can switch on/off thumbs up/down icons - read more [here](#)
- new Charts report - read more [here](#)

Setup window

There are multiple features you can set up in Setup window:

1. [Players](#)
2. [Dossier Monitor](#)
3. [Display](#)
4. [Dossier File Sharing](#)
5. [Kill Counts](#)
6. [Recent Battles](#)
7. [Colors \(Reports & Charts\)](#)

Setup Players

1. Click Setup button on [common toolbar](#) and you should get a screen like the one below:

2. Click **Players** and then click **Add** button

3. **Pop-up** will appear

4. Click **Browse** button to select a dossier file

Copy respective path (depending on your Windows version), **paste** it into File Name field and press **Enter**.

Examples:

Window XP	Windows 7
Path: C:\Documents and Settings\%USERNAME%\Application Data\Wargaming.net\WorldOfTanks\dossier_cache	Path: %APPDATA%\Wargaming.net\WorldOfTanks\dossier_cache

This will display existing dossier files as seen on right hand picture above.

5. **Select one dossier file**

When you select dossier file, player's nickname will be displayed in Player ID field:

Note: You can track statistics of multiple players. The only requirement is that you acquire their dossier file (whether they send it to you by email; they upload it to some FTP site; or they log in to WoT game on your computer).

Please have in mind you would need to acquire your friend's subsequent dossier file to track their progress over time.

6. Check "Get Shared File" checkbox if you want to retrieve particular player's dossier file from Shared Folder site. Read more: [Dossier File Sharing](#)

7. Click Save button to save a player

Once you are done, all players should be listed in Players section:

Setup Dossier Monitor

There are three options you can set up in this section:

1. Monitor Dossier on Startup

When this checkbox is checked (it is recommended to have it checked) application would automatically start monitoring dossier file(s) on application startup and it will refresh results after each battle.

2. Minimize App on Startup

When this checkbox is checked application would be minimized (visible in Taskbar only) when started

3. Minimize to System Tray on close

When this checkbox is checked application would be minimized (visible in System Tray) and will be running in background instead of being closed.

To close application right click its icon in System Tray and click Exit.

4. Start App When Windows Starts

When this checkbox is checked application would start every time Windows starts

IMPORTANT!

It is recommended to have **Monitor Dossier on Startup** option checked.

However, pay attention if monitoring is working in application's status bar at the bottom:

Monitoring could also be stopped manually on [Dossier Monitor / Stop](#) button.

5. Reset At

Select the time when you want your Overall report to be reset.

NOTE: Please press Refresh button (or restart application) to apply this settings.

Setup Display

You can use this section to set up how results would be displayed on your screen.

1. Font Size

HTML Heading

Change font size of your column headers.

HTML Detail

Change font size of data in table(s).

2. Images

Show Thumbs Up/Down icons

Check this checkbox if you want Thumbs Up/Down icons to be displayed

Example:

Checked	Not Checked
<input type="checkbox"/>	<input type="checkbox"/>

3. Formats

Please use this section to select preferred date/time format that would be used throughout application.

4. Top 5 List

Enter minimum number of battles for a tank that you want to be included in Top 5 section of [Overall report](#) (bottom part of report).

5. Language

Select preferred language. **Please note** changed settings would take effect after **WoT Stats is restarted**.

Note: File "translations.xml" can be found at %appdata%\WOT Statistics

IMPORTANT

Any players willing to help in translating this app to their local language are more than welcome. Please leave a note at <http://forum.worldoftanks.eu/index.php?/topic/117131-wot-statistics/#top>

6. Rating Formula

Select Rating Formula that you want to use when tracking your progress.

Selected formula would be used on [Overall](#), [Tanks](#), [Tank Info](#) and [Recent Battles](#) report.

Setup Dossier File Sharing

- **Allow Dossier Sharing**

Check this checkbox if you want to share (upload/download) yours and/or your friend's dossier files. When checked, fields below would be visible.

- **FTP Server**

Type in web address of FTP server that you would use for file sharing

- **User ID**

Type in your User ID to access FTP server

- **Password**

Type in your Password to access FTP server

- **Allow Dropbox/Sky Drive/Google Drive Sharing**

Beside FTP, you can also share your dossier file using Dropbox, Sky Drive or Google Drive Sharing

How Dropbox/Sky Drive/Google Drive Sharing works?

- Please select your shared folder (e.g. Dropbox folder).
- Your own dossier file would be automatically copied to selected folder.
- Check "[Get Shared File](#)" checkbox for your friend's dossier files that you want to track.
- Your friend's dossier file would be copied from selected folder to your computer.

Setup Online Analyzer

NOTE: Online Analyzer has been depreciated in WOT Stats 2.0.4.0

Check this checkbox if you want to be able to use [Online Analyzer](#) button.

Setup Kill Counts report

Each option adds some additional data on Kill Counts report:

1. Display Tier Totals

Displays total of enemy vehicles destroyed grouped by tier

2. Display Row Totals

Adds column at the right end of the table displaying total kills for each vehicle

3. Display Column Totals

Adds row at the end of the table displaying total enemies destroyed grouped by tier

Setup Recent Battles report

Show last [xx] battles

In this field enter maximum number of games you want to be displayed on [Recent Battles report](#).

Compare

Check this checkbox if you want additional info (columns) to be displayed on your [Recent Battles report](#).

You can compare your recent results **To Overall Stats** or **To Tanks Stats**.

Examples of Recent Battles report layout:

1. "Compare" Not Checked

2. "Compare" Checked

"To Overall Stats" selected 3. "Compare" Checked

"To Tank Stats" selected

Please note new columns added in examples 2 and 3.

Auto create new session

<input type="checkbox"/>	Check this if you want to create new sessions automatically
<input type="checkbox"/>	Check this if you want to create new session certain number of hours after the last battle played
<input type="checkbox"/>	Check this if you want to be prompted if new session should be created
<input type="checkbox"/>	Check this if you want to create new session on application Startup (applies to the first player only)
<input type="checkbox"/>	Check this if you want to be prompted if new session should be created
<input type="checkbox"/>	Check this if you want to create new session after certain number of battles played
<input type="checkbox"/>	Check this if you want to be prompted if new session should be created

Setup Colors

This feature enables you to change colors and overall appearance of your reports and charts.

Report Colors

Change colors of your progress values and/or your efficiency rating on your reports.

Charts Colors

Please note 3 sections here:

- Preview
- Palette - select appropriate colors for chart series here
- Appearance - select appropriate background color for your charts here

Reports

There are several reports you can generate using WoT Statistics:

1. [Overall report](#)
2. [Tanks](#)
3. [Kill Counts](#)
4. [Tank Info](#)
5. [Kill Summary](#)
6. [Custom Groupings](#)
7. [Recent Battles](#)
8. [Charts](#)

All listed reports are available on the left side menu below player's name as seen on picture below:

Please note you can generate these reports for all players that you have set up in [Setup Players](#) section.

You can also generate [Compare report](#) to compare yours results with your friend's results.

Overall report

Here you can find numerous information about your achievements and your progress. When reviewing your results, please mind the period you are looking at.

Note: Your report might look differently, depending on settings in [Setup Display](#) section.

Note: Values calculated in *Delta* columns are based on period you are reviewing.

You can keep track of your friends progress as well if they provide their dossier file or if they simply log in to WoT (the game) on your computer. (Read more: [Setup Players](#))

How to change the dates?

Click [Period Selection](#) button.

Important!

Period Selection settings are stored individually for each player!

Tanks report

Here you can track progress for each tank.

Tier	Tank	Battles	Victories	Defeats	Draws	Kills	Damage Caused	Damage Received	Damage Ratio	Capture Points	Defence Points	Enemy Spotted
V	 KV-1	754 0	440 0	291 0	23 0	1,024 0	604,996 0	389,338 0	1.55 0.00	1,723 0	514 0	676

VI	 T-34-85	423 0	233 0	178 0	12 0	390 0	288,050 0	240,710 0	1.20 0.00	758 0	188 0	673

Please note you can **sort** your data by each column by clicking on column's header.

In example above data are sorted by number of battles.

Tank Info report

Here you can see yours (or your friend's) total results for each tank.

Please select player from the left menu and tank from the right side menu.

Note: Toolbar has been changed for this report in version 2.0.6.25

- [Recent Battles report](#)
- [Tooltips](#)
- [Display List](#)
- [Grouping](#)
- [Scroll through sessions](#)

You can read more about options available for this report in [Setup Recent Battles](#).

Please note you can **sort** your data by each column by clicking on column's header.

This report shows details for each battle played.

#	Tier	Tank	Status	Survived	Damage Dealt	Damage Received	Kills	XP	Spotted	Capture Points
1	V	T-50-2	Victory	Yes	1,414	521	7	1,636	7	0
2	IV	T40	Victory	No	693	275	0	511	4	0
3	VIII	T32	Defeat	No	1,688	1,550	2	760	2	0
4	VII	T20	Defeat	No	281	1,100	1	234	3	0
5	VII	AMX 13 90	Defeat	No	1,215	1,000	0	322	1	0
6	IX	E-75	Victory	No	1,091	1,920	1	958	1	0
7	IX	E-50	Victory	Yes	1,638	1,725	0	1,045	2	0
8	VI	VK 3601 (H)	Victory	Yes	2,816	170	4	1,750	3	0
9	V	PzKpfw III/IV	Victory	No	651	440	2	664	2	0
10	VII	VK 3002 (DB)	Victory	No	2,141	1,250	3	1,291	2	0

IMPORTANT!

WoT Statistics must be running in order to display results correctly on this report.

If you notice e.g. **1.5** kills or **2.3** spotted for some tank it means results for 2 or more battles with that tank are grouped into one row.

You can also read details about that if you hover your mouse over tank name.

Tooltips

You can get more info about your **Kills**, **Hit Ratio** and **Rating (Efficiency, WN4, WN6 or WN7)** if you hover your mouse pointer over values in these columns.

Defense Points	Hit Ratio
0	100.00%
0	90.00%
0	84.62%

Shots:	13	1.00%
Hits:	11	1.89%

Tooltip Examples:

Kills Hit Ratio Rating

	T18	Shots: 13	<table border="1"><thead><tr><th></th><th>Value</th><th>Eff.</th></tr></thead><tbody><tr><td>Damage</td><td>1,913</td><td>713.11</td></tr><tr><td>Kills</td><td>1</td><td>360.00</td></tr><tr><td>Detected</td><td>4</td><td>550.50</td></tr><tr><td>Capture</td><td>6</td><td>527.08</td></tr><tr><td>Defence</td><td>0</td><td>0.00</td></tr><tr><td>Total</td><td></td><td>2,150.69</td></tr></tbody></table>		Value	Eff.	Damage	1,913	713.11	Kills	1	360.00	Detected	4	550.50	Capture	6	527.08	Defence	0	0.00	Total		2,150.69
				Value	Eff.																			
	Damage	1,913		713.11																				
	Kills	1		360.00																				
	Detected	4		550.50

Defence	0	0.00																						
Total		2,150.69																						
Leichttraktor	Hits: 11																							
Leichttraktor																								

Green bar on Rating tooltip explanation

Highest value (713.11 in example above...) is represented with full length green bar.

Length of other green bar represents ratio compared to the maximum value, e.g. 360 value is represented with approx. 50% green bar.

Start New Session

You can **Start New Session** on your Recent Battles report by clicking on Start New Session button.

Session will last until you click that button again.

So, you can have multiple sessions per day or you can have one session lasting for a few days.

Display List

From Display List dropdown you can select what you want to display on Recent Battles report.

- **Current Session** will display all battles played since you last time started a new session
- **Today's battles** will display all battles played today
- **Last 3 days** will display battles played in last 3 days
- **Last week** will display battles played last week
- **Last 50 battles** - Please note the last option "Last 50 battles" is taking value from settings at [Setup Recent Battles report](#)

Grouping Recent Battles results

You can **group** your recent battles result by Tank, Tier or Country.

Depending on your choice report will have different layout:

Example:

None
<input type="checkbox"/>
By Tank
<input type="checkbox"/>
By Tier
<input type="checkbox"/>
By Country
<input type="checkbox"/>

Scroll through sessions

You can scroll through all available sessions by using this part of the toolbar on Recent Battles report.

- | | |
|----------------------------|--|
| 1. First Session | displays the oldest session |
| 2. Previous Session | displays previous session |
| 3. Session number | enter session number here to display exact session |
| 4. Next Session | displays next session |
| 5. Last Session | displays the latest session |

This feature is available only when Current Session is selected in [Display List](#).

Charts report

Here you can preview your progress graphically.

Please note you can preview total results or results for specific tank.
You can even compare two or more tanks!

Here is Efficiency comparison between T-44 and E-50:

Read more about how to define charts in [Define Charts](#) section.

Compare report

This feature enables you to compare results of two players.

Please note you can compare **player selected on the left side menu** with other players.

Note: You can even compare player with him/herself by comparing different tanks of the same player.

	PzKpfw VI Tiger	PzKpfw VI Tiger
Battles	189	150
Victory Percentage	58.05%	56.67%
Defeat Percentage	39.47%	42.00%

Average Experience	585.73	527.14
Maximum Experience	1,647	1,252
Accuracy Percentage	84.48%	80.51%
Damage Ratio	0.79	0.74
Kills/Battle	0.75	0.87
Kills/Deaths	1.10	1.28
Efficiency	1,242.29	1,072.95
Average Damage	950.47	919.38
Average Capture Points	2.58	0.84
Average Defense Points	0.45	1.15
Average Spotted	1.20	1.05

Select nation and tank to generate Compare report.

IMPORTANT!

You have to click **Close** button to close this report.

Toolbar commands

There are two sets of toolbar buttons:

1. Common toolbar buttons

- 1.1. [Refresh](#)
- 1.2. [Period Selection](#)
- 1.3. [Dossier Monitor](#)
- 1.4. [Compare](#)
- 1.5. [Online Analyzer](#)
- 1.6. [Setup](#)
- 1.7. [Help](#)

2. Context toolbar buttons

- 2.1. [Define Groupings](#)
- 2.2. [Start New Session](#)
- 2.3. [Define Charts](#)
- 2.4. [Grouping \(None, By Tank, By Tier, By Country\)](#)

Common toolbar commands

h

Refresh

Click Refresh button (or press F5 key) to refresh your results.

Refresh will also try to download updated files from your ftp site or shared folder (read more [here](#) and [there](#)).

Note: There is no need to refresh results when [Monitor Dossier on Startup](#) is checked.

Common toolbar commands

h

Period Selection

This feature enables you to select particular period that would be used to generate results on your reports.

These are default setting but you can select any (well, almost any) period you like. Please make sure date (or period) selected on the left hand side is "older" than the date (or period) on the right hand side.

Custom drop-down would list all dates when dossier file was updated.

Since data are summarized daily, every day you log in to WoT game you practically create one entry in Custom drop-down box.

The first date you can select is the day when you have set up player's dossier file (Read more: [Setup Players](#))

Note: Different periods can be applied to different players so always pay attention to your report's header.

Common toolbar commands

h

Dossier Monitor

Use these commands to manually Start/Stop monitoring your dossier file(s).

Started:

Stopped:

Common toolbar commands

h

Compare

Please select any combination listed below Compare button to run comparison between two players.

Please note you can compare **player selected on the left side menu** with other players.

Note: You can even compare player with him/herself by comparing different tanks of the same player.

Left hand menu example:

Common toolbar commands

h

NOTE: Online Analyzer has been depreciated in WOT Stats 2.0.4.0

Online Analyzer

Online Analyzer button will automatically upload your dossier file to <http://www.vbaddict.net/wot.php> and display your results.

It is web based statistics application that can also display various results and your progress over time.

Troubleshooting

Online Analyzer is disabled

- go to [Setup/Online Analyzer](#) and check "Submit dossier file to World of Tanks Performance Analyzer and Statistics site" checkbox.

After hitting Online Analyzer button you might receive something like this:

If this happens, follow these steps:

- click on "Upload your own dossier file and analyze it" link
- click "Choose File" button and select your dossier file
- click "Upload" button

Common toolbar commands

h

Setup

Read more about this feature in [Setup](#) topic.

Common toolbar commands

h

Help

Three commands are available from this menu:

- a) Help - you are already reading it ;)
- b) Important Notice - see important notifications
- c) Credits - people involved in WoT Statistics project

Context toolbar commands

Define Groupings

This button is available when [Custom Groupings report](#) is selected.

Define Groupings feature enables you to easily track one or more tanks (usually tanks you play frequently) and their progress.

You can add/edit or remove any created custom group by clicking on Define Groupings button.

Steps:

a) Click on Define Groupings button and you'll get pop-up window like on the picture below:

b) Click Add button and following pop-up window will appear:

c) Enter group name into Group Name field, select desired tank(s) and click Save button

When finished, your Custom Groupings report could look something like this:

Context toolbar commands

Start New Session

This button is available when [Recent Battles report](#) report is selected.

Click Start New Session button to create new session for the user whose Recent Battles report you are reviewing.

Context toolbar commands

Define Charts

This button is available when [Charts report](#) is selected.

Define Charts feature enables you to graphically display your progress over time.

You can **add, edit or remove** any chart by clicking on Define Charts button.

Once defined, chart is available for all players!

Steps:

a) Click on Define Charts button and you'll get pop-up window like on the picture below:

b) Click Add button and following pop-up window will appear:

c) Enter name of the chart into Chart Name field

d) Select base for calculation - Overall or Tank

e) Select desired period

f) Select Category

g) Click Save

h) Click Close

You will notice chart name displayed on the **right** hand side menu:

Menu

There are three menus in WoT Statistics application:

1. Players
2. Tanks
3. Charts

Examples:

All of them can be **docked** or automatically **hidden**:

When hidden, menus would be shown like this:

Menus are also **re-sizable**:
